

SMITTYBILT NEWS

CLASS: SB ISSUE: 23 MONTH/YEAR: OCT 2013 PRODUCT HIGHLIGHT: ATLAS BUMPERS

JK FRONT & REAR BUMPER

AVAILABLE NOW

The brand new Smittybilt XRC Atlas front and rear bumpers are the latest and greatest products to come out of the Smittybilt R&D Department. These bumpers have gone through extensive design and testing to meet stringent international pedestrian safety standards. As a result, these bumpers are stylishly chiseled as well as being extremely strong and functional. The rear bumper utilizes a new cam-style pin adjustment for ensuring perfect gate stowing every time. Re-opening the gate requires minimal effort and the double latch will eliminate accidental opening. These bumpers offer impressive ground clearance and can accommodate up to 40" tires. Enjoy the MOLLE/PAL compatibility to allow multiple pouch mounting configurations.
